Aspire GCSE AI

Staff Quick-Start Guide — Classes, Baselines and Weekly Reports

AI-marked GCSE Maths practice built by an examiner • aspiregcseai.co.uk

1. Invite your pupils

1 Copy the class joining link
Open School workspace → Classes and pupils, select your class, then click Copy class joining link.

2 Share the link with your class
Send it through school email, Microsoft Teams or Google Classroom. Pupils register with their school email and confirm it.

3 Approve each pupil
Pupils request to join; click Approve beside each name. Each approved pupil uses one licensed place — no pupil ever pays.

2. Invite another teacher

- The school lead opens School workspace → Teachers, enters the teacher's email and clicks Create invitation, then copies and sends the invitation code.
- The teacher signs in and chooses Accept teacher invitation.

3. Set the baseline exam

- Open the Baseline tab, choose the board, tier and paper, and set a deadline.
- Every approved pupil sits the same full timed paper; the timer is enforced by the system.
- Pupils can type, upload a photo, or write with a finger or stylus on the writing pad.
- AI marking follows the mark scheme; you can review and override any mark.

4. After the exam — automatic targeted revision

- Each pupil receives feedback and a QLA report once their paper is marked.
- Every topic a pupil lost marks on is queued automatically.
- The pupil watches a short lesson video, then answers a fresh similar question.
- A wrong retry sends them back to the video; a correct one completes the topic.

5. Monitor progress weekly

- Open the Weekly tab and pick any week to see each pupil's activity and marks.
- See baseline scores, completed revision topics and outstanding work at a glance.
- Download class CSV summaries and individual pupil QLA and feedback PDFs.

Good to know

- School Premium is £10 per pupil per year — staff accounts are free.
- Pupils never see the same question twice; practice, baselines and retries all count.
- Invitations are shared by you — the app does not email them automatically.
- Questions are generated in exam style and are not officially verified by any exam board.

Aspire GCSE AI is a trading name of Aspire Affordable Tuition • Independent of AQA, Edexcel, OCR, WJEC and Pearson
